

## **Car Whiz for Car Ventilation and Cooling**

*"The simple solar ventilation solution for your car"*

- Help eliminate scorching heat build-up.
- Powered by solar energy, no consumption of car battery, and pollution free.
- Equipped with crystalline solar panel that provides powerful solar output current of more than 700 MA; creates enough torque to ensure high air ventilation capacity.
- Simple DIY installation, and could fit into most vehicles with sliding window glass of curved or straight top. Good for cars either with clear, dark windows or window attached with sun-film.
- No drilling, no nailing and safe
- Designed to prevent water penetration during car washing.
- Equipped with movable remote array that could best access sunlight into the solar cells, ensuring an effective solar application.
- Ventilator with remote array design is patented.

**- Is your car too hot in summer?**

**- How can you change this?**

**- Do you want an eco friendly and sustainable solution?**

**We have what you need!**
